RESOLVE A CUSTOMER ISSUE AND CLOSE THE LOOP

Give the next responder the customer's issue in context

Capture the customer, what happened, order or job, photos and immediate action in one issue record before assigning the response.

Log the issue > Resolve and record > Close the loop with the customer

SkillSmith · Share an observation through a published form

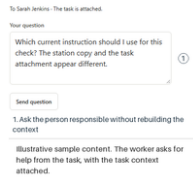

1. Record the observation where work happens

Illustrative sample content. A worker can use a published form to share an observation without an assigned task.

SkillSmith · Carry the earlier incident response into the investigation

SkillSmith · Ask for help with the task attached

Share an observation through a published form

Pay only when you see results

Agree the outcome for your first workflow with our team.

YOUR TEAM / THE DECISIONS THAT MATTER

The people involved in the working method

Each role has a defined contribution. Your team selects the people responsible for those parts of the work.

Your role	The contribution	SkillSmith support
Person raising the issue	Log the issue	Respond with customer, immediate action, order or job and photos.
Assigned team member	Resolve and record	Respond with goodwill within policy, resolution and time.
Team lead	Close the loop with the customer	Respond with customer informed, nonconformance raised? and satisfied / escalated.

Clarify the problem and contact context

In a worked example, the issue is logged without enough detail to act; clarify the specific problem and contact context before assigning the response.

WORKED DECISION

Decision point	Information to use	Responsible next step
Working material	Issue	Open the selected material for this occurrence.
Recorded response	customer, what happened and order or job	Save the response with its work context.
Review point	photos and immediate action	Agree the next action with the person responsible for this decision.

Review the selected material, this occurrence's response and any conditional follow-up.

CONNECTED WORK / PREPARED PLAYBOOKS

Resolve a customer issue and close the loop

Bring issue into the prepared work. Person raising the issue, Assigned team member and Team lead each receive the context needed for their part.

01 Log the issue

Record customer, what happened, order or job, photos and immediate action.

02 Resolve and record

Record resolution, goodwill within policy and time.

03 Close the loop with the customer

Record customer informed, satisfied / escalated and nonconformance raised?.

Prepare the useful part of the workflow

Use the prepared sequence with the resources and responsibilities selected for your team.

Resolve a customer issue and close the loop

A complaint or service failure is logged where it happens, resolved by the person who can, and closed with the customer - with systemic causes handed to quality.

YOUR INFORMATION / CONNECTED WORK

The materials that make this method usable

Keep the relevant material available at the point it is used. The resource choices below support different parts of the work.

Your work context > SkillSmith > Your next contribution

Issue The task uses this material	The customer issue form.
Guidance The task uses this material	Service recovery guide and goodwill limits.

YOUR DELIVERY PLAN / OUR TEAM

Prepare the first useful playbook

Start with the materials and people you already have. We help make the setup choices explicit before your team uses the method.

01 Select the working material

Choose issue from the resources your team uses.

02 Agree the responsibilities

Confirm person raising the issue, assigned team member and team lead for this method, then choose the people eligible to receive its work.

03 Walk through the selected route

Choose the task, eligible recipients and deadline, then walk through the actual response fields.

Brent Jackson
Director of Customer Success

Prepare the method for your team

What stays with the recorded response?

The response for this occurrence retains customer, what happened, order or job, photos and immediate action. It belongs to the work being reviewed, rather than replacing a different occurrence's record.

Which materials do we need to bring?

Bring issue. We use those choices to prepare the working context, then check that each task opens the material it needs.

How do people receive the prepared work?

Select the prepared task and the relevant recipients when assigning work. Making a playbook available to a group and giving a person a task are separate setup choices.

What is the outcome for the wider workflow?

Customer informed; resolution recorded; systemic causes handed to NONCONFORMANCE.

WHY SKILLSMITH / YOUR NEXT STEP

Bring your work; we help prepare the method

We work with your team to organize the source material, responsibilities and review choices. Start with one useful example, then carry the agreed method into everyday work.

Without connected follow-through	With SkillSmith
The person has to leave the work to find its instructions or help.	Open the selected resources with the task, and keep a question attached when help is needed.
The current status hides which response or version came before it.	Keep customer, what happened and order or job with the work, with recorded history available for later review.

Walk through this method with us

Bring one real example and the material your team uses. We will walk through the task sequence and the decision that matters to you.

- Which customer context, issue and requested response belong in the case?
- The resource choices for this method
- Each responsible person's response
- The conditional route and wider outcome
