ASK FOR HELP WITH THE TASK ATTACHED

Ask for help with the task already in view

Bring the task, question and responsible owner into the conversation so a colleague can respond with the relevant work context attached.

Open Ask a question > Write question > Send with task attached

SkillSmith · Ask for help with the task attached

To Sarah Jenkins · The task is attached.

Your question

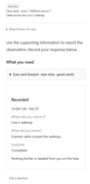

Which current instruction should I use for this check? The station copy and the task attachment appear different.

Send question

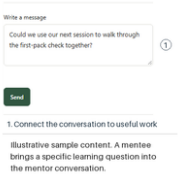

1. Ask the person responsible without rebuilding the context

Illustrative sample content. The worker asks for help from the task, with the task context attached.

SkillSmith · A recorded observation stays attached to its task

SkillSmith · Bring a practical question into the mentoring conversation

Ask for help with the task attached

Pay only when you see results

Agree the outcome for your first workflow with our team.

YOUR TEAM / THE DECISIONS THAT MATTER

Who can use this product method

The method keeps the stated role and access scope. Your team confirms the people involved.

Your role	The contribution	SkillSmith support
Task participant	Open Ask a question, Write question and Send with task attached	Use the method within the permitted scope for the selected information.

Add the task context to the question

In a worked example, the question arrives without the relevant task; attach the work context while preserving its underlying access permissions.

WORKED DECISION

Decision point	Information to use	Responsible next step
Inputs to review	Task and Question	Open Ask a question.
Method action	Responsible owner	Write question and Send with task attached.
Result to inspect	Context-linked conversation and Retained question	Inspect the available result within the permitted scope.

Review the selected material, this occurrence's response and any conditional follow-up.

CONNECTED WORK / PREPARED PLAYBOOKS

Prepare the method for your team

What can we inspect after using this method?

The method provides context-linked conversation and retained question. The responsible person can see the question and linked work.

Who uses this method?

The permitted roles are Task participant. Confirm the people and their access for the selected example.

Which choices do we need to make first?

Review task, question and responsible owner. Use those choices to prepare the first example and its permitted scope.

What task context will let a colleague answer the question usefully?

The question arrives without the relevant task; attach the work context while preserving its underlying access permissions.

WHY SKILLSMITH / YOUR NEXT STEP

Bring your work; we help prepare the method

We work with your team to organize the source material, responsibilities and review choices. Start with one useful example, then carry the agreed method into everyday work.

Without connected follow-through	With SkillSmith
A question reaches a colleague without the task it concerns.	Ask a question with the task context attached and keep the next responsible contact clear.
A person cannot raise a question against the decision's actual context.	Use contextual questions and human review as the basis for a clear correction route.
People coordinate repeatedly to find the same context and help.	Use ready work, targeted help and shared resources to reduce avoidable coordination.

Walk through this method with us

Bring one real example and the information needed for this method. We will walk through its actions, result and permitted scope.

- What task context will let a colleague answer the question usefully?
- The inputs and available actions
- The people and permitted scope
- The result to inspect
